Article ID: 1133940.html Published: 08/28/2018 Product support for Xerox Color 550/560/570 Printer 550_560_DCP Family Ads from Btab Xerox Printer Error Code 024-747 is called a common problem that the user encounters when processing a device for printing. The main reason for the problem is due to incorrect system configuration settings, the inappropriate size of the paper placed in the paper tray, and more. To solve this problem completely, you need to check online available blogs and articles or contact Xerox support specialists to get immediate help. Try: Step 1: For various reasons, you can conduct or suspend work created for resources from jobs from jobs. For example, if a printer does not have paper or the correct size of paper, type or color requested from a printing job, is not loaded, or is properly configured on one of the trays, the job is done for resources. In addition, if you submit a sample job, the first copy of the job prints and the rest of the copies are held until you release them. If the system administrator has set up Hold All Jobs, any job sent to the printer is done before it is released. When you print in the control panel, click Jobs. Select Active Jobs.To to determine why the job was done, select a job to view Details.Do one of the following: Print the job required for resources, replenish the resources you need. Be sure to set up a tray setting for downloaded media. The job resumes automatically if you have the resources you need. If the job is not automatically printed, tap Resume.To delete the print, tap Delete. On request, touch Delete.To all the jobs held, select the release all Jobs.To return to the home screen, click Home. NOTE: If the job is not removed, cancel all held jobs by pressing and holding the Power button until the machine shuts down. Wait until the power light stops blinking before powering the printer back. Step 2: Make sure that Tray Used to work is configured with the correct paper size and TypeWhen paper loading trays, make sure the program tray is with the correct paper size and type of paper. Step 3: Make sure the type of paper and size is set correctly in the print driver: These steps were performed on a computer with the Microsoft Windows 7 operating system. Steps will vary depending on other operating systems. Choose the right type of paper and size: Open the print file. Click on the print.Click file to print Preferences or properties to access Xerox print driver settings. Click on the Print Options tab. Click on the retractable paper menu, choose a different type, and then choose the right type of paper. For example, a simple or light Cardstock.Click on a paper retractable menu Choose a different size and then choose the right size of paper. Choose any other print options you need. Click on OK. Click on OK or Print to send the job to the printer. Step 4: Make sure that Print Driver usedMake sure that supported driver printing is used. We recommend using the PostScript (PS) print driver. Visit www.support.xerox.com to find print drivers for this printer. Go to support drivers to visit the forum without a doubt, Xerox is a well-known brand for the production of printers that are effective and thus widely used. Among the best features of Xerox printers are their durability, reliability and high-quality performance at a reasonable price. But sometimes users face many problems because of several reasons.
